

Product Category Analysis

Electronics leads in total revenue at \$156,905, while Clothing has the highest quantity sold at 894 units.

Key Findings

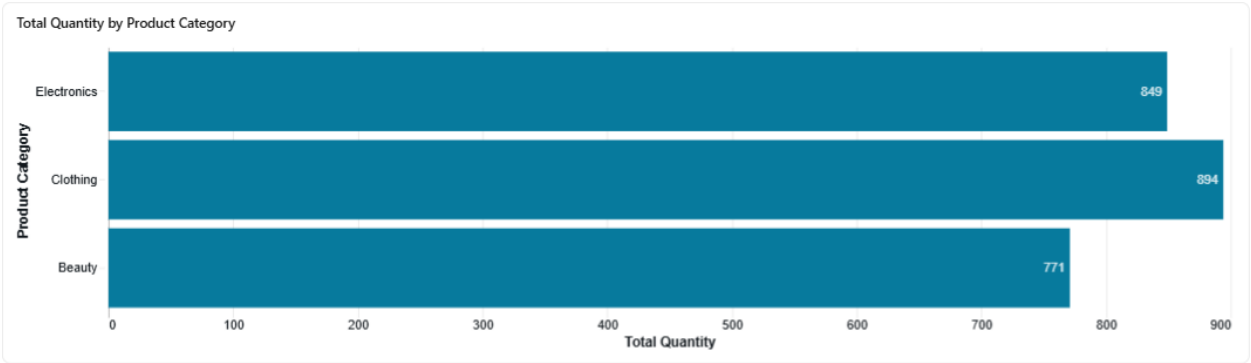

Total Amount Performance

Electronics generates the highest revenue (\$156,905) despite having the lowest quantity sold (849 units), driven by its highest average price per unit of \$181.90. Clothing follows closely with \$155,580 in revenue from 894 units, while Beauty generates \$143,515 from 771 units.

Quantity Performance

Clothing leads in volume with 894 units sold across 351 transactions, followed by Electronics (849 units, 342 transactions) and Beauty (771 units, 307 transactions). The relatively balanced distribution suggests consistent demand across all three categories.

Pricing Insights

Beauty products command the highest average price per unit at \$184.06, followed by Electronics at \$181.90 and Clothing at \$174.29. Despite Beauty's premium pricing, its lower transaction volume results in the lowest total revenue among the three categories.

Product Category Summary

Product Category	Total Quantity	Total Amount	Transactions	Avg Price/Unit	
Electronics	849	\$156,905	342	\$181.90	
Clothing	894	\$155,580	351	\$174.29	
Beauty	771	\$143,515	307	\$184.06
